

ABSTRACT OF THE INVENTION

5 The present invention discloses a surgical guide and accompanying depth bur
with a method for its use during sinus elevation surgery utilizing the Caldwell-Luc
Osteotomy procedure. The surgical guide of the present invention provides accurate
transfer of the parameters of the surgical osteotomy to be performed during sinus
elevation surgery. It bridges the gap between the precise information obtained from the
10 Dentascanner and the surgical field on which this surgical plan must be placed. This is
accomplished by the use of the surgical guide which is constructed based on the
information in the Dentascanner and the treatment plan prepared utilizing Simplant.
